

Human Services
 Emphases in:
**Chemical Dependency, Criminal Justice,
 Human Services/Behavior Health, and Psychology**
Associate of Arts (AA) Degree Program
 Division of Human Services

Angela Johnson, MEd, Division Chair

Crystal D. LaPlante, MSW, Instructor

The field of Human Services is rapidly growing and constantly in need of skilled professionals. Blackfeet Community College's Associate of Arts in Human Services Program prepares students to pursue a career in a variety of helping fields, such as alcohol and drug rehabilitation, behavioral health centers, social service agencies, youth centers, criminal justice facilities, schools, and community outreach programs. The curriculum is composed of courses in Human Services, Psychology, Chemical Dependency and Criminal Justice. In addition to classroom coursework, the program offers hands-on field experience.

It is the student's responsibility to check with their transferring institution to see that, as much as possible, their course work meets their transfer institution's degree requirements.

The Learning Outcomes from the Human Services degree program are as follows:

- 📖 To develop knowledge and skills related to human services fields and practice.
- 📖 To develop effective written and verbal skills to accurately and appropriately read, inform and convey information.
- 📖 To apply knowledge and skills critically in the context of living and/or providing services to the Blackfeet Reservation and larger global community.
- 📖 To complete the foundations required to transfer to a four-year program if desired.

Students majoring in Human Services are required to take the General Core Requirements 1 – 6 for an Associate of Arts (AA) Degree program on page 11-2 as well as courses in Human Services Core 7.
