

Business Management

Associate of Science (AS) Degree Program

Division of Business & Information Technology

Zana Mcdonald, Division Chair

Raymond Montoya, Sr., Business Instructor

The Business Management Associate of Science (A.S.) Degree program provides students with the fundamental knowledge and skills to begin building a career in business or to prepare for completion of a bachelor degree. Along with providing a solid general business education, the Business Management AS Degree program incorporates practical application of sharpened problem solving skills. Integrated throughout the program is an emphasis on developing the ability to make effective business operational and administrative decisions. The degree program includes development of “soft skills” such as business etiquette, emotional intelligence, social capital, and civic duties. The program covers key areas dealing with economics, management, marketing, accounting, and business law as well as related courses that prepare students for active and successful careers. The program will provide the student with the intellectual foundations necessary to contribute effectively and positively to a changing business environment. The curriculum is designed to preserve the culture and heritage of the Blackfeet People relative to business management by integration of cultural concepts in the course of study.

The Learning Outcomes are as follows:

- Develop contemporary business management theories and practices
- Acquire knowledge of Generally Accepted Accounting Principles (GAAP) and their application through financial and managerial accounting
- Development of personal capacity in leadership, critical thinking, problem solving, and ethical decision making at all organizational levels from first time supervision through middle management to executive levels.
- Develop an understanding by applying and implementing business practices reflecting the diversity of customers, employees, employers, and stakeholders of various societies and cultures.
